

Preserving ancient fish

National Archeological and Ethnographic Museum “Giovanni Antonio Sanna” of Sassari.

Tuesday, July 25th, 2017 at 6:30 p.m.

How did one preserve fish in a time when refrigerators, electricity and artificial preservatives didn't exist?

Strategies and methods of preservation and fishing resources in the ancient world, as exposed by Sardinian archeology. On Tuesday, July 25th, 2017 at 6:30 p.m., in the conference hall of the National Archeological and Ethnographic Museum “Giovanni Antonio Sanna” of Sassari, via Roma 64, Gabriele Carenti, archeozoologist from the Center for Studies on Seaside Civilization and Appreciation of the Gulf and Park of Asinara, will make a presentation by the name of “*Preserving ancient fish*”

A meeting that will aim to reconstruct past history and show it all to the public, through a meticulous archeological research, the historical reconstruction of useful methods for retracing important dietary information from the ancient world.
